We Specialize in Hernia Repair – And it Shows In Our Outcomes

Dr. Harris is dedicated to the diagnosis of, treatment for, and recovery from abdominal hernias. He is the highest volume hernia surgeon in California and one of the top 3 in the country, performing over 500 hernia repairs per year. This focus on hernia repairs translates into better outcomes for our patients compared with other surgeons.

Recovery From Hernia Surgery

Recovery from hernia surgery usually does not vary dramatically from one patient to the next. Through our focus on hernia care, we have been able to establish 'best-practices' for patients just like yourself. On average, most patients can expect the following for their hernia recovery after hernia surgery.

We also encourage patients to review our post surgery pain management protocol including how we've eliminated opioid use in our patients after surgery.

Recovery Basics

As with any surgery, most patients experience post operative pain in the area of their hernia repair. Most patients will also experience some level of swelling and bruising in the area. We

Comparing California Hernia Specialists to Other Centers and Hospitals

At California Hernia Specialists, we differ from most other surgical groups and surgery centers in that each member of our team – from the first phone call, through your surgery with Dr. Harris, to your final follow up visit – is focused on hernia patients just like you. Most other hospital groups or general surgeon groups in the country provide wide ranging care which limits their ability to perfect their outcomes for hernia patients like yourself.

By providing over 500 hernia repairs per year, it allows us to ensure the highest quality and most consistent outcomes possible. Comparing California Hernia Specialists is easy using the chart below.

Comparing California Hernia Specialists

“Large hospitals and busy general surgeons are important parts of the health care delivery system in the United States. However, for patients like you who have a focused medical condition like a hernia, being thrown into the complexities of hospitals which are more focused on patients with cancer, heart disease, trauma, and other complicated issues isn't the best choice. Similarly,

Hernia Research and Quality Recognition

Hernia research as well as participation in numerous hernia conferences and task forces is an important part of improving our patients initial experience at the time of their surgery as well as their long term results. Due to his volume of surgeries and research, Dr. Harris has been asked to speak at national hernia conferences, participate in task forces to help advance hernia care, and to be part of multi-day thought leaders symposiums. This diverse array of involvement helps to keep us up-to-date on the latest data and allows us to provide cutting edge care to our patients.

Since 2013 we have been a part of the Abdominal Core Health Quality Collaborative. This unique organization helps high quality surgeons like us track our patient outcomes to

Hernia Research and Quality Recognition “

Dr. Harris Selected as ACHQC Verified Surgeon of Quality

The goal of the ACHQC Verified Surgeon of Quality program is to recognize and distinguish participating surgeons for their dedication to improving the quality and value of health care for patients who suffer from hernia disease and diseases of the abdominal wall or abdominal core. Improved quality and value are realized through the consistent entry of data in the ACHQC Registry and participation in ACHQC's continuous quality improvement programs.

ACHQC leadership believes surgeons focusing on quality improvement efforts will perform at their highest level. We hope that through this verification program, surgeons will be recognized by their peers and broader network for their dedication to improving the quality and value of patient care in their communities.

Dr. Harris was presented with the 2024 ACHQC Verified Surgeon of Quality recognition for fulfilling the qualities and traits outlined above. This designation provides a recognition that the quality of care being provided is above and beyond the typical care being provided at other surgeons offices in the community.

Through participation in research with the ACHQC, our hernia center can ensure that we are following the highest standards of care for our patients, as well helping to define parameters for quality for future patients. Without being active in research and outcome tracking, an individual surgeon could not

Choose Your Surgeon Based on Patient Outcome Data – **Nothing Else Matters**

Once you've decided to have surgery for your hernia, the next step is choosing who to trust as your surgeon. The ideal Surgeon would provide:

- Low recurrence rates (or chances the hernia will return)
- High quality of life (QOL) and low incidence of chronic pain
- A comprehensive post-surgery pain management protocol with minimal need for opioids
- Low rates of infections and other complications

For years, our center has worked with the Abdominal Core Health Quality Collaborative (ACHQC) to track our patient outcomes as well as being a Verified Surgeon of Quality by the ACHQC.

As shown below, in each metric our center has significantly better outcomes when compared to other surgeons across our region and the country. Our hernia practice is one of the only centers in the country to provide complete transparency to patients as they are

VERIFIED SURGEON OF QUALITY

ACHQC Verified Surgeon of Quality Program

The **ACHQC Verified Surgeon of Quality** program was established to recognize and distinguish participating surgeons for their dedication to improving the quality and value of health care for patients who suffer from hernia disease and diseases of the abdominal wall or abdominal core. Improved quality and value are realized through consistent data entry in the ACHQC Registry and participation in ACHQC's continuous quality improvement programs.

ACHQC leadership believes surgeons focusing on quality improvement will perform at their highest level. We hope that through this verification program, you will be recognized by your peers and broader network for your dedication to improving the quality and value of patient care in your community.

As an ACHQC Verified Surgeon of Quality, you will be:

- Showcasing your commitment to providing quality health care and delivering value to patients through your participation in the ACHQC Registry and its continuous quality improvement programs
- Distinguishing yourself from other surgeons for being dedicated to providing quality care
- Enhancing your credibility among peers and your broader network
- Signaling your readiness and dedication to improving outcomes for patients

You will receive:

- Recognition on ACHQC's Verified Surgeon of Quality web page
- Media kit -- PDF certificate and digital badge

ACHQC Verified Surgeon of Quality program is open to all ACHQC surgeons entering data in 2025.

CHRISTOPHER BAILEY, MD

Austin Regional Clinic - Austin, TX

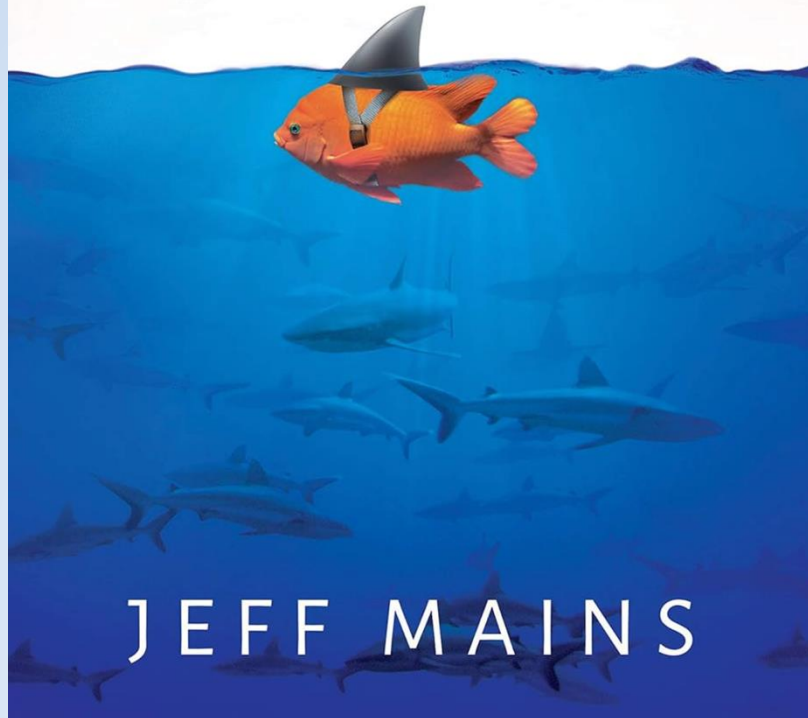

As an extremely physically active person, facilitating early return to work and getting people back to 100% is my biggest priority. For this reason, I am most passionate about advancing my own practice and teaching other surgeons minimally invasive hernia repair techniques with the robotic platform. Being a part of the ACHQC since its inception has been a critical part of this mission worldwide.
