

- Data-driven quality improvement within one central location
- Secure and confidential data platform
- HIPAA, GDPR certified, FDA-II, HITRUST

NEW Hiatal Hernia Module

- Collect key quality metrics related to hiatal hernia and paraesophageal surgical repairs
- Measure and benchmark surgical outcomes and post-operative function

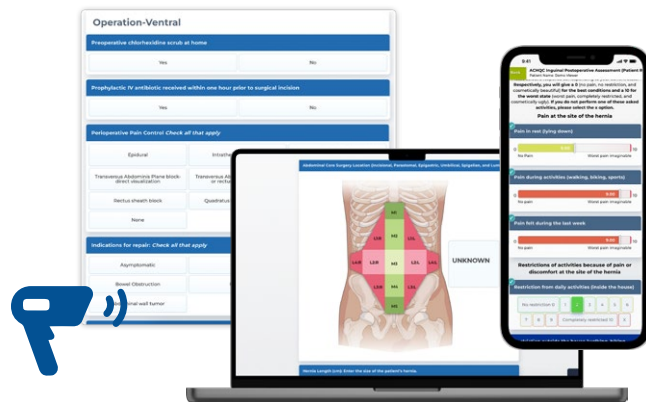

Operation-Hiatal			
Intraoperative endoscopy performed			
Yes	No		
Approach:			
Laparoscopic transabdominal	Open transabdominal	VATS	Thoracotomy
Robotic transabdominal	Robotic transthoracic	MIS converted to open	
Operative Findings:			
No hiatal hernia	Type I hiatal hernia	Type II paraesophageal hernia	
Type III paraesophageal hernia	Type IV paraesophageal hernia		
Procedure details: Choose all that apply			
Hernia sac dissected from mediastinum	Hernia sac excised and removed from the esophagus		
Division of short gastric vessels	Collis gastroplasty		
Crural repair	Mesh reinforcement		
Funduplications	Use of a bougie		
Gastrostomy	Gastrostomy tube		

Registry Platform Benefits

- Time-saving
- Reduced form burden
- Hiatal, Ventral, Inguinal Modules
- Secure data environment
- Measure quality metrics

Time-Saving Features

- Auto-generate operative notes
- Identify operative details with anatomic imagery
- Scan and upload bar code data
- Customizable favorites/macros reduce form burden

PM/EMR Integration

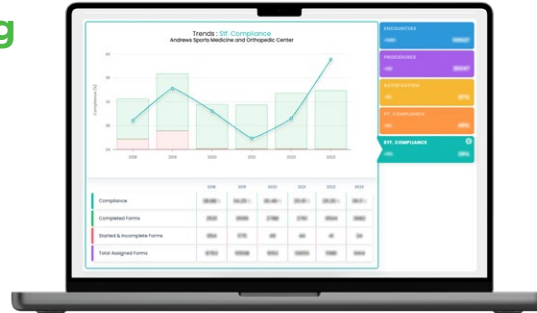

- Reduce manual data entry
- Streamline patient data capture
- Avoid errors and duplicate entries

PM/EMR integration is optional with various levels of integration.

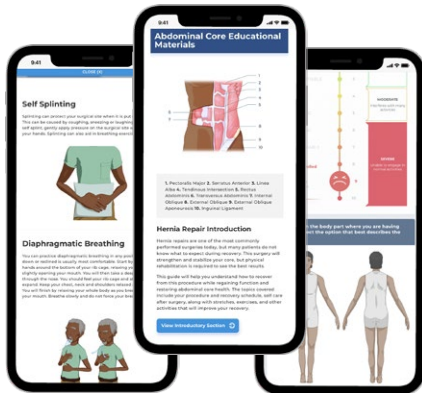

Reporting, Benchmarking & Auditing

- Auto-generate reports and dashboards
- Benchmark quality outcomes
- Audit data responses
- Includes historical data

Optional Packages Available

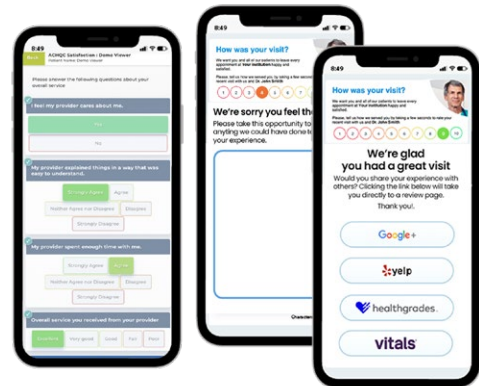

Wellness

Comprehensive patient engagement:

- PROs
- Body-marker pain scale
- Clinical and surgical satisfaction
- Procedure specific education

Satisfaction and Reputation Management

- Patient satisfaction measures
- Drive and maintain positive public profile

Wearables

ActiveTrack app collects core patient activity information
