

# ACHQC Long Term Follow Up

## Data Abstraction from Electronic Medical Record

*(Index operation = operation being followed in ACHQC)*

Step 1

Open ACHQC and select patient  $\geq 1$  year after index operation and open patient record in EMR

Step 2

Review EMR for any reoperation for recurrence or SSI/SSO intervention after index operation date

Step 3

Find latest EMR documented abdominal exam from any provider or CT/MR/US of abdomen/pelvis (either exam or radiographic study acceptable)

Step 4

Enter information in Additional Follow Up tab in ACHQC:

->If no documented recurrence in EMR, enter no recurrence in ACHQC

->If no documented signs of SSI/SSO in EMR, enter no SSI/SSO in ACHQC

->If a documented recurrence, reoperation for recurrence or SSI/SSO is found in EMR, enter information as needed in ACHQC  
(note: Date of Follow Up in ACHQC is the date of the latest EMR record with pertinent information)

Step 5

Save Additional Follow Up entry in ACHQC
